

160mm Heavy Duty Directional Lock Castors - Polyurethane Castor Wheel

160-5000-PAL/D

Directional Lock added to our 160mm polyurethane castors. Directional lock is a way of making a swivel castor into a fixed castor temporarily - by locking the swivel head but not the wheel which means castor moves in one direction. Directional lock castors are great for cornering or pivoting. Can be added to just one trolley wheel - usually front left of the trolley if left cornering or front right if right cornering.

Technical Specifications

	Bearing Type	Ball Journal
	Colour	No
0	Hardness of Tread	92 shore A
KG	Load Capacity (kg)	700
KG X4	Max Load Capacity of 4 Castors	2100
	Plate Dimension Length (mm)	140
<u> </u>	Plate Dimension Width (mm)	110
	Plate Hole Centres Length (mm)	105
I	Plate Hole Centres Width (mm)	80/75
**************************************	Plate Hole Diameter	10
٥	Product Type	Top Plate Castors
3	Swivel Radius	150
Į.	Temperature Range	-20 min to +60 max
1	Thread Material	No
<u>\$</u> [Total Castor Height	200
→ P-	Tread Width (mm)	50
(S)	Wheel Centre	Aluminum
0	Wheel Colour	Yellow
<u></u>	Wheel Diameter(mm)	160
0	Wheel Material	Polyurethane
